

# LEAD FREE KIDS

This child facility has not reported any lead dust wipe sampling, nor any other information about its facilities procedure on cleaning and monitoring for dangerous contaminants such as lead, mold and other heavy metals that may enter kids playing area from outside through shoe traffic.

American Lead Free Kids Association (ALFKA.ord) has placed this facility on future inspection list and will report its findings on their profile for public viewing.

The results have been reviewed by Gennadiy Khotinskiy, who is licensed and certified by United States Environmental Protection Agency as a lead investigator who has fulfilled the requirements of the Toxic Substances Control Act (TSCA) Section 402, and has received certification to conduct lead-based paint activities pursuant to 40 CFR Part 745.226 as inspector in the jurisdiction of All EPA Administered Lead-based Paint Activities Program States, Tribes and Territories.
